FitKit-SI

Thanks so much for ordering a Fit Kit! Let's get started!

These sizing instructions are for the
Spansplint™ and Infinisplint™

Whether you're sizing for one splint, or more, the FitKit works the same. Simply repeat for each splint. When you are finished, submit your information to customerservice@blingsplints.com

For the sizing steps below, the multisizer should be "just snug". Not so snug that it puts pressure around the finger or thumb, as you should still be able to slide the multisizer slightly.

1. Insert the multisizer end into the slot on the other end, making it into a belt shape
2. Find the ring size of the affected fingers
3. If you have enlarged joints, be sure the splint will fit over them
4. **Is this for the left or right hand?**

LEFT HAND			
	ABOVE JOINT	AROUND JOINT	BELOW JOINT
