

(Opening degree)	105°
(Diameter of hinge cup)	Φ35mm
(Height of hinge cup)	11.3mm
(Cup hole distance)	52mm
(Dimension of door)	3 ~ 7mm
(Range for door thickness)	14~22mm

- ♦ H = (height of mounting plate).
- ♦ K = (distance from edge of door to the edge of the cup).
- ♦ D =(required cover distance on side panel).
- ♦ A = (gap between door and side panel).
- ♦ L =(distance from inside edge of door to the outside edge of side panel).
- ♦ T =(door thickness).

Formulas below can be used according to different type of arm of hinges,and need figures of both drilling holes “ K ” on the door and the height of the mouning plate “ H ” when solving problem.
