Origin information

Carlos Duran Matias inherited El Carrizal along side his brothers and sisters, but took on the role of farm manager. El Carrizal is the oldest farm in the area, it started at 14 hectares and the family has grown the farm to over 30 hectares. Diversity is the order of the day and the coffee is grown under a variety of shade trees which produce other crops and help to contribute towards soil health.

The farm has an onsite wet mill where the coffee is washed and processed, then sun dried on patios.
