## PIETRO SIMONE | FACE

### Encore I. THE INTEGRAL RESTORER

An intensive moisture-restore treatment, encompassing Pietro Simone's advanced "Signature deep tissue dry massage" and layer techniques. Combined with his luxurious skincare enriched with the exclusive Italian Bella Complex – a skin innovation derived from nature's jewels of the Mediterranean. And science-led custom Spa formulas; Recovery pack to cushion and boost moisture levels. This premium anti-aging facial is a great way to experience an Encore facial with its signature spotlight on hydration and skin-saving nutrients. Helping to increase elasticity and promote collagen production for vibrant feel-good skin.

**60min** of Spa Performance  
designed to restore firmer,  
radiant, integral skin beauty.

£150

**90min** of Spa Performance  
designed to restore firmer,  
radiant, integral skin beauty.

£250

### Encore II. THE MULTI-REFINE AND SCULPT

An essential skin resurfacing treatment comprises Pietro Simone's unique "**Signature Organic Cotton Thread**" method and "Signature deep tissue dry massage". Combined with his luxurious active skincare and science-led custom Spa formulas, all enriched with the exclusive Italian Bella Complex – a skin innovation derived from nature's jewels of the Mediterranean.

This rejuvenating anti-aging facial has a signature spotlight on multi-phase deep exfoliation. Helping to encourage cellular renewal and increased micro-circulation for smoother looking, healthy skin with renewed freshness and vitality.

**60min** of Spa Performance  
designed to rejuvenate mature  
/stressed skins for refined skin  
texture and redefined beauty.

£150

**90min** of Spa Performance  
designed to rejuvenate mature  
/stressed skins for refined skin  
texture and redefined beauty.

#### Encore IV. MULTI-REFINE AND SCULPT PEPTIDE INFUSION

An outstanding treatment featuring Pietro Simone's exclusive **Signature Organic Cotton Thread** method, "Signature deep tissue dry massage" and layer system. Combined with his luxurious active skincare, enriched with the exclusive Italian Bella Complex – a skin innovation derived from nature's jewels of the Mediterranean. And custom science-led Spa formulas; the high-potency **IBC-P Concentrate** or **IBC Peptide Concentrate** phased application.

An effective, rejuvenating anti-aging facial with a signature spotlight on intense moisture and multi-phase deep exfoliation, helps to encourage intelligent cellular renewal with IBC and Peptide breakthrough skin technology.

**90min** of Spa Performance designed to re-awaken and firm mature /lined /stressed skins for recharged beauty.

£250

#### Encore V. THE PEPTIDE REGENERATOR

A comprehensive skin regenerative treatment featuring Pietro Simone's advanced "Signature deep tissue dry massage" and layer techniques. Combined with his luxurious active skincare range all enriched with the exclusive Italian Bella Complex – a skin innovation derived from nature's jewels of the Mediterranean. And custom science-led Spa formulas; the high- potency **IBC-Peptide Concentrate** and **Recovery pack** help lift, nourish and promote healthy hydration.

A precise and decadent anti-aging facial that shines a keen spotlight on Peptides - this scientific beauty breakthrough, helps to intelligently encourage the skin's own capability to rejuvenate and restore.

**90min** of Spa Performance designed to reinvigorate and retrain skin health and contoured beauty.

£250

#### Encore VI. MULTI-REFINE AND SCULPT PEPTIDE INFUSION + MICRONEEDLING

An outstanding high-tech facial featuring Pietro Simone's exclusive Signature Organic Cotton Thread method, Signature Deep Tissue technique and specialist Microneedling. Combined with his luxurious active skincare enriched with the exclusive Italian Bella Complex. This is an effective, rejuvenating anti-aging facial with a signature spotlight on microneedling and its inner approach to re-building healthier skin. Microneedling provides an even greater absorption of the powerful peptide and hyaluronic active skin cocktail used to penetrate at a much deeper level, creating non-invasive 'micro-channels' that trick and force the collagen and elastin fibres to repair and recover with renewed strength, protection and plumper vitality.

**60min** of Spa Performance designed to help diminish scar tissues, deep wrinkles and reinvigorate lack lustre skin regardless of age.

£190

**90min** of Spa Performance designed to help diminish scar tissues, deep wrinkles and reinvigorate lack lustre skin regardless of age.

£350

#### Encore VII. MULTI-REFINE AND SCULPT PEPTIDE INFUSION + HYDRA- MICRONEEDLING

An outstanding high-tech facial featuring Pietro Simone's specialist Microneedling technique combined with select Prestige Collection formulas. This superb anti-aging facial has a signature spotlight on Microneedling and its inner approach to re-building healthier skin. Microneedling also provides an even greater absorption of the powerful Pietro Simone Ageless Multi-V Solution used to penetrate at a much deeper level, creating non-invasive 'micro-channels' that trick and force the collagen and elastin fibres to repair and recover with renewed strength, protection and plumper vitality.

**60min** of Spa Performance designed to help diminish scar tissues, deep wrinkles and reinvigorate lack lustre skin regardless of age.

£190

**90min** of Spa Performance designed to increase micro-circulation, reduce fine lines and wrinkles.

£350

## ACCENT PRIME FACE CONTOURING DOUBLE CHIN REDUCTION

MiniSpeed is the newest Accent Prime Ultrasound technology especially designed to redefine the jaw line, by smoothing the contours of the mandible and promoting the reduction of double chin whilst tightening the skin of the neck, chin and jawline and reducing cellulite.

The MiniSpeed face uses a unique 100 kHz frequency to create mechanical vibration and 2 wave modes. The unique Resonance of the Ultrasound guided waves directs controlled damage to the membrane of the fatty cells specifically the platysmal bands to breakdown the targeted tissue whilst the vibration of the adipocytes leads to disintegration of the fatty cells to comfortably shape and tighten skin around the neck and jawline. A heat monitor as well as controlled power levels ensure a comfortable yet effective treatment.

Duration  
**45 minutes**

£350

## RF FACE LIFTING AND SHAPING

The RF Face is Accent Prime's latest innovation in Radio Frequency technology for contouring the face. The Radio Frequency hand held device delivers the unique, unipolar AlmaWave to create a safe, even heat, into the dermis to increase metabolism whilst also contracting collagen fibres. This contraction stimulates the formation of new collagen tightening the skin which the RF Face does whilst simultaneously decreasing the liquid retention held in the face to help both lift and shape the face.

Duration  
**60 minutes**

£200

## CELLCOSMET FACE

### Swiss Deluxe Anit-Aging Cellfacial

High-end, personalised cellular treatments. Specially formulated to revitalise, prevent the effects of ageing, and reveal radiance. Carefully adapted to the skin's biological age and sensitivity.

Duration  
**90 minutes**

£250

### Swiss Deluxe Intensive Elasto-Collagen

The must of this collection. Restores firmness, elasticity, tones cutaneous tissue, redefines facial contours and revitalises deeply the skin.

Duration  
**90 minutes**

£250

### Swiss Ultrasonic Revival

High-end, personalised cellular treatments. Strongly recommended as an intensive treatment.

Duration  
**60 minutes**

£200

## BIO REVITALISATION TREATMENT

The PRX-T33 formula combination of 33% TCA and 67% hydrogen peroxide quickly penetrates the dermis, activating a process of regeneration without attacking the epidermis. Promoting stimulation of fibroblasts and growth factors without causing inflammation or damaging the skin, PRX-T33 is suitable for all skin types. A non photosensitising treatment, it can be performed all year round.

**A unique alternative to injectable treatments & peels. Ideal for:**

- Loss of firmness of the skin on the face and chest
- Firming of the skin on breasts
- Depressed scars
- Stretch marks
- Adjuvant in the treatment of melasma and cutaneous hyperpigmentation
- solar lentigines and elastosis
- bio-revitalisation

PRX-T33 is effective as a single treatment but can also be used in combination with other aesthetic medicine treatments such as PDO threads, micro-needles and fractional lasers to enhance the effects.

Duration  
**45 minutes**

£350

Course of 5

£1600

## CO2 LIFT

Oxygen is crucial for reducing the impact of aging on your skin. However, your body also needs carbon dioxide (CO2) to help direct the healing benefits of oxygen to certain areas. By applying CO2 to the face, neck, and hands, your body releases oxygen to take its place. This helps heal, improve, and rejuvenate your skin. CO2 Lift treatment contains a gentle, all-natural solution that helps your body release carbon dioxide so that oxygen can step in and replace it, thus helping improve and revitalize your skin instantly. In fact, the CO2 Lift delivers a nice, cooling sensation that has a soothing effect. Co2 Lift is clinically proven to be effective in treating lines, wrinkles, rough texture, and dryness on or around your:

- Face
- Neck
- Eyes
- Hands

If you're looking for radiant skin that practically glows, then you'll love that the CO2Lift mask benefits your skin in the following ways:

- Increased hydration
- Smoother, more improved texture
- Reduced wrinkles and lines
- Tighter, more lifted appearance
- Fewer acne breakouts
- Healthier, more radiant glow

Duration  
**45 minutes**

£120

## CLEAR &amp; BRILLIANT

**Simple, Effective, Affordable Proactive Treatments.**

If you're battling the effects aging can have on your skin, or trying to address it before the battle even starts, Clear + Brilliant can help. With simple, gentle laser treatments provided by your licensed skincare professional, you can help prevent the visible signs of aging and the overall dulling effects time and the environment can have on your skin.

One 10 to 20-minute Clear + Brilliant session can leave your skin feeling smoother, younger and give you that "radiant glow" that comes from healthy, youthful skin. Routine treatments deliver lasting results that can keep you looking younger for years to come.

**Clinically Proven. Clinician Accepted. Patient Demanded.**

There's no question that Clear + Brilliant delivers real results. In clinical studies, Clear + Brilliant helped refresh skin tone and texture. Time after time, Clear + Brilliant patients reported "looking and feeling younger" and rediscovering their skin's natural "radiance and smoothness". For our patients, these are the kind of results that speak volumes.

## DERMOPIGMENTATION

Permanent Make-Up is a tattooing technique, known by the name of DERMOPIGMENTATION, this technique main goal is to apply a tattoo that can be biologically assimilated by the organism over time. The use of absorbable pigments brings many advantages such as the possibility of changing the tattoo design over time, (be it the eyebrows or any other areas of choice), hence to adapt it to the changing morphology and shape of a face as time goes by.

Permanent make-up is not just requested to “heal” and cover up beauty blemishes. It is also a means to enhance the expressiveness of a face, which is strongly related to the eyebrows, to the eyebrows shape and to their location. Eyebrows are a strong means of meta-verbal communication. Their expressiveness is of absolute importance when it comes to the communication ability of a face. Permanent Make-Up can be the solution to make a blemish disappear. However, it can also be the fulfillment of an aesthetic desire.

In both cases, the positivity it brings is not just visual as its effects branch out to mend a person's insecurities and lack of self-esteem. Simply put, it makes someone feel better about the way they look. This already is a great accomplishment. The intra-lashes technique aims to render a stare alluring and charismatic by making the eyes more visible. It is a rather simple yet effective concept and it releases us from the necessity to wear heavy and often invasive make-up. On the other hand, an eyeliner technique will create a different effect and satisfy a different request. The eyeliner technique is more evident and it can alter the shape and asset of the eyes.

In order to modify the dropping tendency some eyes develop the eyeliner technique is the perfect answer. The ability to fulfill a desire is never to be discounted as it often brings psychological benefits with it. Filling-up techniques are instead fundamental to even out the lips pigmentation in case of a hypo chromatic situation. Reconstruction techniques are needed if the lips asymmetry is rather visible or if one wishes to “augment” the lips volume without touching the anatomic structure of a face. The hyper realistic technique is the most apt to accomplish that, as it will allow the customer to enrich the beauty of her lips with a simple touch of gloss.

EVA FACIAL

A new modular facial device brings together three phases to give a total solution for facial rejuvenation, skin conditioning and contouring.

**Phase 1 Sensorised Ablative Microvibration (S.A.M)**  
S.A.M exploits Endosphères® Compressive Microvibration method, creating a mechanical peeling effect to ablate the skin's surface. Using the spheres to create ablative micro-vibration. The gel microspheres are positioned on a rotation axis which is offset by 13.7 degrees. The traction and the mechanical movement of the spheres results in the ablation of the upper layers of the skin. This friction affect additionally has a stimulating effect on the tissue and prepares it for stage two. The ablative or peeling effect helps to smooth the skin and improve the overall texture.

**Phase 2 Face- Compressive Vibration**  
The latest development of the use of compressive micro-vibration techniques has evolved into an effective stimulation technique in the deeper skin layers. Compressive Micro-Vibrations create a frequency from 40 Hz - 310 Hz of which the rotation and pressure determine the intensity of the treatment for optimum comfort. The rotation and pressure compress the tissues, producing a pump effect, that works in four ways:

- Draining action is the lymphatic draining, where the silicon spheres rotate to drain the waste.
- Relaxation action improves the haematic flow by relaxing the mimic (expression) muscles and in general all face and neck muscles
- Vascular action like the second works on the muscles however, also works on the tissue and hypodermic: further improving haematic flow

but also improving the tissue acidosis, allowing the flow of oxygen and nutrients, improving the oxidative stress, whilst also preventing the effects of aging on the skin

- Restructuring action is specific for wrinkles. The direct application causes a localised micro-trauma improving microcirculation providing oxygen, encouraging stem cell regeneration.

**Phase 3 Vibro Electro Delivery ( V.E.D)**  
Transdermal electroporation is the application of a small electrical pulse to the skin. This electrical pulse disrupts the cell membranes of the skin making them more permeable allowing the transport of larger molecules. The disruption facilitates the entry of selected product's into the deeper layers of the skin. V.E.D. uses transdermal electroporation and exploits the pore opening achieved by the FACE treatment and the exfoliation achieved by SAM, facilitating the transmission and entry of up to 90% of active substances in the tissue for an exceptionally deep nourishment.

FIBROBLAST

Fibroblast, new revolutionary non-surgical lift treatment is highly effective, remarkable alternative to surgery.

- Some of the conditions which may be treated by Fibroblast include:
- Eyelid lifting / tightening
  - Wrinkle reduction
  - Neck tightening
  - Reduction of the upper lip wrinkles
  - Reduction of stretch marks and scars

**How long does each treatment session take?**  
A session lasts around 30 minutes with instant results. Fibroblast is a revolutionary face-lift procedure that requires no surgery. It tightens and lifts the skin with instant results. Fibroblast is a non-surgical non-invasive treatment that shrinks excess skin, bags and wrinkles. It is revolutionary in wrinkle smoothing and eyelid tightening, dramatically reducing hooded eyelids.

**How does it work?**  
The Fibroblast hand-piece produces a tiny plasma flash which leaps from tip to the skin in a micro-millimetre sized point. This superficial point minimises the skin in its immediate vicinity - which reduces the excess skin, tightening the lid / under eye area. A series of tiny brown spots are strategically placed to attain the desired result for the excess skin. The skin around the spot tightens pulling the cells closer together. It's the only treatment to successfully reduce the excess skin.

**The results?**  
Eyelids feel lighter, with the heavy lid massively reduced. The eyelids are also smoother, without excess folds of skin. The application of make-up is easier and has increased longevity!

## HIGH FREQUENCY FACIAL

An old school method, extremely important to set up the right environment of the nutrients, oxygen and detoxification of the epidermis. This amazing technique must be incorporated in most of the facials and procedures to achieve the maximum results.

During the high frequency facial, gentle currents of low-level electricity infuse the skin with purifying and rejuvenating oxygen molecules. This encourages cellular repair, elevates collagen and elastin and cleanses away impurities.

- Clear existing acne and prevent breakouts
- Soften appearance of fine lines and wrinkles
- Improve skin texture and even out skin tone
- Shrink the size of enlarged pores
- Reduce areas of puffiness
- Exfoliate away dead skin cells and debris

Duration  
**60 minutes**

£100

## HIGH POTENCY LED THERAPY

LED light therapy is a painless, relaxing, non-invasive skin-care treatment that has multiple benefits—particularly stimulating collagen and treating mild to moderate acne.

LED treatments work by using an array of bright light-emitting diodes (originally developed by NASA!) that send low-level light energy into the deeper layers of the skin. “Red light LED stimulates cellular activity, including the fibroblasts that produce collagen, which gives young skin its plump look. That helps minimize fine lines and wrinkles, treat sun-damage and stretch marks Blue light LED works by killing propionibacterium acnes, the bacteria that lives below the surface of the skin and is responsible for acne. Both are highly effective when part of a series—usually six treatments one to two weeks apart, followed by a maintenance treatment every month or two. LED treatments last about ten to twenty minutes, and can be a stand-alone treatment or part of a facial.

Duration  
**30 minutes**

IN CONJUNCTION WITH  
OTHER TREATMENTS

£80

## SMA LIFTING- HIFU

SMA Lifting- HiFu uses a high-intensity focused ultrasound system, non-invasive and non-surgical, able to produce a deep facial lifting effect generating deep ultra focal thermal energy points without damaging the skin surface. The ultrasonic energy is concentrated in different points of the skin, according to the selected HEAD during treatment. This produces effects in both superficial and deep dermis then on adipose tissue and mimic muscle tissue. The results are obtained with a single treatment and can be seen immediately after the session, reaching its peak after about 3 months. To keep the maximum result, the protocol provides for repeat application of SMA Lifting every three to four months.

Duration  
**60 minutes**

£700

## CLEAR LIFT

Clear Lift™ is an easy and effective way of rejuvenating collagen. By increasing the collagen we improve skin imperfections, such as wrinkles, fine lines, photo-damage, uneven skin tone and skin laxity.

Clear Lift™ uses an infrared laser as well as the first fractional, non-surgical Q-Switched laser technology, making it able to treat even the most sensitive areas of the face, neck and décolleté. The Q-Switched laser creates a controlled dermal wound whilst leaving the epidermis intact. This stimulates growth of new collagen leaving skin feeling and looking tighter.

Duration  
**45 minutes**

£250

## CLEAR SKIN SKIN REMODELLING

Clear Skin™ is the ultimate Acne treatment, designed as an option when prescription and over the counter creams and treatments do not work. Clear Skin™ uses a combination of non-surgical laser technology to create a vacuum mechanism combined with

contact cooling to treat all forms of acne vulgaris in an effective yet comfortable therapy. The treatment works by

1. Suppressing p.acne
2. Reducing sebum excretion rate
3. Reducing inflammatory response

Duration  
**30 minutes**

£150

## iPIXEL TEXTURE AND TONE

Age inevitably takes hold of us and as blemishes, wrinkles and age spots may begin to show, the texture of our skin changes, becoming coarse and uneven.

The iPixel laser creates pixel-sized perforations in the skin. The perforations heal, a process called epithelization. The acceleration of re-epithelization can be considered exercise for the skin. Leaving the skin looking younger and and smoother.

## ANTI-REDNESS LASER

Spider veins form when valves weaken and the blood begins to pool rather than flow to the heart. As this happens the blood vessels become enlarged and visible on the skin. The **Dye-VL Anti Redness Laser** uses a combination of technologies to close these vessels as well as a sold sapphire tip to cool the skin during treatment for longer periods of time. Leaving you with smooth clear skin in a more comfortable treatment.

**Dye-VL Anti Redness Laser** combines Intense Pulsed Light technology (IPL) with Advanced Fluorescence Technology (AFT) to create a targeted uniform pulses of UV light energy. The UV light energy is first converted to the optimal spectrum using AFT then an advanced IPL technology is directed at the hemoglobin and oxyhemoglobin chromophores closing the veins leaving their appearance reduced or completely eliminated in a process called photothermolysis.

Duration  
30 minutes

£150  
TO  
£250

## NIR SKIN TIGHTENING

Fine lines, wrinkles, photo-damage, uneven skin tone and skin laxity are all signs of aging skin. With NIR you can tackle the signs of aging skin using the Q-Switched laser, near infrared technology or a combination of both. Short term benefits include skin tightening and glow whilst in the long term the NIR will restructure the skins architecture strengthening the skin against future aging.

The NIR lamp causes micro thermal injury with by using a high power light source to achieve safe and effective sub-dermal heating. This contracts the fibres stimulating new collagen and tightening laxity, improving alignment and thickness.

Duration  
60 minutes

£150

## ANTI PIGMENTATION LASER

Hormonal changes as we go through life-cycles can affect the body's distribution of melanin to the skin. Melanin is what controls the colouration of our skin and when this becomes affected it can lead to the appearance of sunspots, age spots, and melasma (a dark patchy facial discolouration).

Face

## DERMAPEN

Micro-needles are 0.5-1.5 mm in length. During treatment, the needles pierce the stratum corneum and create microconduits (holes) without damaging the epidermis. Microneedling leads to the release of growth factors which stimulate the formation of new collagen (natural collagen) and elastin in the papillary dermis. In addition, new capillaries are formed this neovascularisation and neocollagenesis following treatment leads to reduction of scars. The procedure is therefore aptly called "percutaneous collagen induction therapy" and has also been used in the treatment of photoageing.

The new collagen matrix then becomes cross-linked and organised during the re-modelling phase, which can continue for up to 12 months. Each dermal treatment triggers the normal healing response within the skin and successive treatments build new collagen progressively and fills in depressed scars, deep lines and much more.

Skin Needling Acne Scars,  
**60 minutes**

£200

Using 540 extremely fine medical-grade gold and titanium needles, the Derma-roller painlessly creates micro-channels in your skin which trigger the body's natural healing process to create new, healthier tissue to replace the imperfections of older skin. By renewing your skin cells regularly, it helps the following:

Reduces lines & wrinkles on face and body

Reduces character lines around the mouth areas

Helps with skin firmness and elasticity

Used for acne and chicken pox scars

Reduces or eliminates face and body scars

Decreases Enlarged pores

Helps reduce Sun damages

Helps Hyper-pigmentation

Clears pores and follicles by gently exfoliating to stimulate blood flow

## ZO OBAGI STIMULATOR PEEL

Treatment is a must for skin that feels rough or looks dull, as it uses a new, unique combination of exfoliating ingredients to renew and revive skin. With no downtime, this is the ultimate results-oriented treatment that many of your patients have been looking for.

### All skin types

Time is an approximation indicated for optimum results maintenance

**45 minutes**

£150

Once a week for a month. Every 4-6 weeks

## ULTRA HYDRATION

Ultra Hydration Treatment is designed specially to target dry, dehydrated skin to restore hydration, and to provide soothing, cooling and calming comfort.

### Dry, dehydrated and weak skin

Time is an approximation indicated for optimum results maintenance

**50 minutes**

£150

Once a week for a month. Every 4-6 weeks

## SKIN BRIGHTENING

Brightening Treatment targets pigment-related issues to help address dark patches and uneven skin tone.

### For skin with Hyperpigmentation

Time is an approximation indicated for optimum results maintenance

**50 minutes**

£200

Once a week for a month. Every 4-6 weeks

## ACNE + OIL CONTROL

Acne & Oil Control Treatment helps to clear skin and prevent breakouts.

### Skin types: Acne, oily rosacea

Time is an approximation indicated for optimum results maintenance

**50 minutes**

£150

Once a week for a month. Every 4-6 weeks

## HAND RENEWAL

Hand Renewal Treatment revives skin that feels rough and looks dull. With no downtime, this is the ideal, result-oriented treatment for many of your patients.

Use as an enhancement or as an à la carte treatment. May also be used as a foot treatment.

Time is an approximation indicated for optimum results maintenance

£120

**30 minutes**

Once a week for a month. Every 4-6 weeks

## INVISAPEEL™ RESURFACING

A no-downtime, resurfacing treatment for all skin types, even sensitive and weak skin. This treatment provides gentle exfoliation that immediately revives dull-looking skin, replenishes skin moisture and minimizes the appearance of discolouration, thus promoting a more even skin tone.

**All skin types, especially weak, sensitive skin**

Time is an approximation indicated for optimum results maintenance

£120

**50 minutes**

Once a week for a month. Every 4-6 weeks

## 3 STEP PEEL™

In-of ce treatment followed by an at-home treatment that produces longer lasting results than ordinary peels:

- Provides epidermal renewal and dermal stimulation
- Patient-friendly peel for everyone, any skin type or colour
- No sedation required
- Supports skin barrier function
- Improves skin's ability to repair and renew itself
- Provides antioxidant protection, DNA repair and anti-inflammation benefits

Time is an approximation indicated for optimum results maintenance

£350

**60 minutes**

Once a week for a month. Every 4-6 weeks

## PEELING COLLECTION

Cell regeneration, often called cell turnover and renewal, refers to the cell's lifecycle, a continuous, natural process that's imperative for skin health. A number of factors can slow this process, hindering the release (shedding) of skin cells such as: aging, excess oil and debris on skin's surface and even improper removal of skincare and makeup products. This can lead to dull, lackluster skin, uneven texture, congestion and breakouts.

Pietro Simone knows the importance of professional exfoliation. Get to know our chemical peel collection designed to address any client skin concern in order to reveal a smoother, clearer and more radiant complexion.

### FLOWER ENZYME

**40 minutes**

£200

### HYDRAFACIAL

Natural ageing plays a role in the health of skin and can contribute to enzyme loss, reduced collagen, and dehydration. This combination of natural and environmental factors stops skin cells from performing at their best, ultimately leading to a decline in elasticity, resilience, tone & texture and speeds up skin health deterioration.

The HydraFacial helps reverse this damage and gives you the means to protect your skin, achieve long-term skin health. The treatment consists of multiple stages which detoxify the skin, remove dead skin cells, extract debris and provide lasting hydration to protect and rebuild collagen levels as well as self-confidence.

Skin Health for Life is the unique HydraFacial philosophy of improving the appearance, restoring youthful, healthy skin. The HydraFacial treatment, gives immediate results and is designed to be enjoyed as a regular monthly maintenance treatment to rebuild skin health and provide continual improvement and enhanced appearance.
