*“In the last year, my slow meditative paper weaving practice has evolved from two-dimensional paper tapestries to three-dimensional geometric sculptures. In this show, I have attempted to create a body of work exploring the idea of prayer and carving out a place for personal meditative contemplation. Inspired by the geometry, architecture and arabesque patterns in temples/churches/mosques that I grew up around, these works are an invitation to viewers to pause, observe, contemplate and rest.”*
