

It's Like a Rainbow: Como Audio Introduces SpeakEasy

Smart Speaker in Five Fashion Colors

For those who want the pleasure of listening to great sounding music with a burst of color, using voice commands for enjoying entertainment, controlling compatible devices around the home, planning a day and managing tasks, [Como Audio](#) introduces the SpeakEasy Smart Speaker System with Google Assistant in piano white with knobs and grilles in five fashion colors of scarlet red, powder blue, mellow yellow, seafoam green and ballet pink. SpeakEasy with the Google Assistant built-in was designed for those who want to enjoy the highest quality sound in music and access all music content with the simplicity of voice command technology. The new SpeakEasy line now offers colors to suit most moods and home decors.

"Our DNA has been rooted in producing great sounding smart audio products that look as good as they sound," says Tom DeVesto, Como Audio Founder and CEO. "We created SpeakEasy as a music system built within a voice-controlled speaker. We added color to the music experience, as red indicates excitement, blue harmony, green tranquility, yellow happiness and pink charm."

The new SpeakEasy color line with the Google Assistant built-in allows music lovers to use voice commands for playing music "Hey Google, play jazz in the kitchen" or "What's the weather today?" or "Turn up the volume" or "Dim the lights." This is all done through the free Google Home app for iOS and Android.

SpeakEasy with the Google Assistant built-in works in concert with a beautifully designed audio device, featuring the room-filling sound quality of Como Audio in a multi-room system. Existing Como Audio customers can group their current models to SpeakEasy with Google Chromecast Audio devices to group all the units to play music together.

SpeakEasy Color is available in piano white with colored grills and buttons to control volume, Play/Pause, Bluetooth, and other functions, and a visual display of time and alarm function. It is powered by a 100-240V external

adapter and an optional battery pack for portability. A matching right channel speaker is available for true stereo sound.

The dedicated Speakeasy Speaker quickly and easily connects to SpeakEasy via its rear audio cable. With 15' of cable, the SpeakEasy Speaker can be placed a good distance from SpeakEasy to create a wide and convincing stereo soundstage...something one-piece "stereo" speakers cannot achieve. Using a wired speaker also means the SpeakEasy Speaker will still work if the Wi-Fi network becomes unavailable, should you stream music to SpeakEasy via Bluetooth from Como Audio Turntable or your smart phone. It's also one less device to congest your Wi-Fi network. An external power supply is not necessary since the SpeakEasy Speaker takes its power from SpeakEasy's two channel amplifier. The unique combination of the wireless SpeakEasy and the wired SpeakEasy Speaker provides an authentic stereo listening experience.

The SpeakEasy Color is compact weighing 3.9 pounds and measuring 9.5" H x 5" D x 4.9" W with anodized aluminum colored knobs and face plate. The alarm, which contains snooze feature, is set by voice command. It has an optical sensor to automatically adjust the backlight based on ambient light conditions. It has 4 Assistant white LEDs to indicate when it is "thinking" and a battery icon to indicate when the battery is being charged.

SpeakEasy features with a 1 x 3" custom 4-layer voice coil woofer, and 1 x 3/4" dome tweeter. The tuned rear bass port provides for efficient bass response and extended range, it also doubles as a convenient carry handle for portability. Outputs are available for USB charging and the optional speaker for greater stereo separation.

SpeakEasy Color is expected to be at market in fall 2019. It is suggested to retail for \$499 in Fashion Colors with a 2-year warranty.
